A measles-rubella (MR) vaccine was mistakenly administrated to the recipient, instead of the Japanese encephalitis (JE) vaccine due to a medical staff assumption.

1. Vaccine recipient mix-up

In advance, ensure the 5Rs, and ask the vaccine recipient or his/her guardian which vaccine he/she will receive.

Pre-vaccination 5Rs

1. Right Drug
2. Right Dose
3. Right Route (Subcutaneous or Intramuscular)
4. Right Time
5. Right Recipient

6. Ask the vaccine recipient or his/her guardian directly about which vaccine he/she will receive!

A number of people may visit to receive a specific vaccine at once depending on the time of year. In haste or based on assumptions, vaccine recipients have been mixed up.
(Case 2) A number of people were at the clinic to receive vaccines. The DPT-IPV (4 combined) vaccine was administered by mistake instead of the DPT (3 combined) vaccine due to a similar package color.

**Vaccine product mix-up**

**Examples of vaccine products with similar appearance or color**

**DPT-IPV (4 Combined) Vaccine**
- Adsorbed Diphtheria-Purified Pertussis-Tetanus-Inactivated Polio (Sabin Strain) Combined Vaccine

**DPT (3 Combined) Vaccine**
- The Japanese Pharmacopoeia Adsorbed Diphtheria-Purified Pertussis-Tetanus Combined Vaccine

**Japanese Encephalitis Vaccine**
- Freeze-Dried, Cell Culture-Derived Japanese Encephalitis Vaccine (Inactivated)

**Influenza HA (Seasonal) Vaccine**
- Influenza HA Vaccine

**Mumps Vaccine**
- Freeze-Dried Live Attenuated Mumps Virus Vaccine “Kitasatodaiichisankyo”

There are different vaccine products with very similar appearance or label color. Please pay attention and check before use.
Colors of vaccine product labels and containers

An identical color is used for the label and container of vaccine products of the same type. Make sure to check the label to avoid mix-up!

Colors of vaccine product containers (for routine vaccination)

Note) Colors of active products may slightly differ from the pictures shown.
Vaccines past an expiration date were accidentally injected.

**Accidental use of vaccines past an expiration date**

- **Make sure to check the expiration date before vaccination.**

Accidental injections of vaccines past an expiration date have often been reported! Please pay attention to the expiration dates of vaccine products in stock regularly.
