Importance of MHM

- Invaluable source of scientific information on herbal medicines
  - Regulators, manufacturers, academia, researchers, health professionals & others
- Authorities information
  - Therapeutic uses of herbal medicines
  - Summaries of pharmacological, clinical & toxicological data
- Guidance for authentication of plant material
- Guidance for quality control profile for herbal materials and products
- Ensuring the quality and right raw material goes into the product
  - correct species
  - correct part
( Authentication is the most basic quality step)
Malaysian Herbal Monograph (MHM)
- Volume 1 (1990)
- Volume 2 (2009)
- Volume 3 (2013)

-20 monograph/species in each volume. (Total :60)
-based on voluntarily work by institution
- National Key Economic Area (NKEA) Malaysian Herbal Monograph (MHM)
  - 2013 - 10 monograph/species
  - 2014 - 15 monograph/species

- www.globinmed.com
- Budget allocated for this project and with key performance indicator (KPI).
Institution involved in development of Malaysian Herbal Monograph (MHM)

- Institute of Medical Research (IMR)
- National Pharmaceutical Control Bureau (NPCB)
- Forest Research Institute Malaysia (FRIM)
- Malaysian Agriculture Research and Development Institute (MARDI)
- Local Universities such as UKM, UPM and USM

- Technical/Scientific Committee
- Main Committee.
WORKFLOW
(By INSTITUTION)

COLLECTION OF MEDICINAL PLANTS

PROCESSING OF MEDICINAL PLANTS

STUDY OF MEDICINAL PLANTS

LITERATURE REVIEW
- Definition
- Synonym & vernacular names
- Medicinal uses
- Dosage
- Storage

IDENTIFICATION
- Plant morphology: photography, macroscopy, microscopy
- Characters
- Colour tests
- Chemical constituents

PURITY TESTS
- Foreign matter
- Ash contents: Total ash, acid-insoluble ash, water-soluble ash
- Loss on drying
- Extractive value

SAFETY TESTS
- Heavy metals limit
- Microbial limit
- Test for specific pathogen

SAFETY INFORMATION
- Preclinical toxicology
- Acute toxicity test

DATA VERIFICATION BY NPCB

CONDUCT BY IMR

DATA VERIFICATION & PRESENTATION
(Technical Committee review, Industry review, Main Committee review)

PREPARATION OF MHM & PUBLICATION
**Content of Malaysian Herbal Monograph (Vol. 2, 2009)**

1.0 Definition

2.0 Synonym
   - 2.1 Latin name
   - 2.2 Vernacular name

3.0 Character

4.0 Identification
   - 4.1 Macroscopic
   - 4.2 Microscopic
   - 4.3 TLC
   - 4.4 Colour test

5.0 Purity test
   - 5.1 Foreign matter
   - 5.2 Total ash
   - 5.3 Acid insoluble ash
   - 5.4 Loss on drying
   - 5.5 Extractive value
Content of Malaysian Herbal Monograph (Vol. 2, 2009)

5.6 Heavy metals
5.7 Microbial limit
5.8 Test for specific pathogens

Storage

Uses

7.1 Uses described in folk medicine, not supported by experimental or clinical data

7.2 Biological activity

Dosage

Chemical constituents

The Malaysian Herbal Monographs Vol. 3.
MALAYSIAN HERBAL MONOGRAPH

NKEA TOP TEN PLANTS

1. Halia Rhizome
   *(Zingiber officinale)*

2. Dukung anak Herb
   *(Phyllanthus niruri)*

3. Misai kucing Leaf
   *(Orthostichon aristatus)*

4. Mengkudu Fruit
   *(Morinda citrifolia)*

5. Kacip Fatimah Root
   *(Labisia pumila var. alata)*

6. Roselle Calyx
   *(Hibiscus sabdariffa)*

7. Mas cotek Leaf
   *(Ficus deltoidea var. deltoidea)*

8. Tongkat Ali Root
   *(Eurycoma longifolia Jack)*

9. Pegaga Herb
   *(Centella asiatica)*

10. Hempedu bumi Herb
    *(Andrographis paniculata)*

MALAYSIAN HERBAL MONOGRAPH

Background

- The development of Malaysian Herbal Monograph (MHM) is one of the government's plans and it is identified as one of entry point projects (EPP) under the National Key Economic Areas (NKEA).
- MHM is a crucial reference to establish good quality of raw material for herbal or traditional products. It provides valuable information for both herbal or traditional manufacturers and regulators such as identification of herbs, quality control requirements, medicinal usage and safety information.

- The production of quality products can promote greater confidence among consumers both inside and outside the country, thus leading to increase usage and exports which will contribute to the country's economic development.
- MHM ensure productions of local and traditional products are safe, of high quality, competitive and comply to international standards.

MALAYSIAN HERBAL MONOGRAPH TECHNICAL COMMITTEE

- Herbal Development Office (HDO), Ministry of Agriculture
- Institute for Medical Research (IMR)
- National Pharmaceutical Control Bureau (NPCB)
- Forest Research Institute Malaysia (FRIM)
- Malaysian Agricultural Research and Development Institute (MARDI)
- National University of Malaysia (UKM)
- Science University of Malaysia (USM)
- Putra University of Malaysia (UPM)

ACHIEVEMENTS

- Publication of Malaysian Herbal Monograph Volume 1 (1999)
- Publication of Malaysian Herbal Monograph Volume 2 (2010)
- Publication of Malaysian Herbal Monograph Volume 3 (15 April 2013)
- Launching of top ten NKEA Malaysian Herbal Monograph 2013 (15 April 2013)

ROLE OF NPCB

- Verification of developed methodology for quality control of herbal raw material
- Method development for quality control of herbal raw material using Thin Layer Chromatography (TLC) and High Performance Liquid Chromatography (HPLC) – including pesticide testing
- Provide training and seminar to local herbal or traditional product manufacturers on quality control of herbal raw material.

All the top ten plants under NKEA can be search at http://www.globinmed.com/index.php?option=com_content&view=category&id=209&Itemid=143
