Revision of Precautions Midazolam (products with an indication to treat status epilepticus)

March 21, 2017

Non-proprietary name

Midazolam (products with an indication to treat status epilepticus)

Safety measure

Precautions should be revised in the package insert.

In the Clinically Significant Adverse Reactions subsection regarding dependence of the Adverse Reactions section, the following text should be revised (underlined parts are revised):

Dependence: Drug dependence may occur due to prolonged use. Patients should be carefully monitored and caution should be exercised for dosage and treatment duration when administering this drug. Withdrawal symptoms such as seizure, delirium, tremor, insomnia, anxiety, hallucination, delusion, or involuntary movements may occur due to rapid dose reduction or discontinuation of this drug during prolonged use. Discontinuation of administration should be carefully carried out such as by gradual dose reduction.
