Revision of Precautions

Chlorhexidine gluconate

October 17, 2017

Non-proprietary name

Chlorhexidine gluconate

Safety measure

Precautions should be revised in the package insert.

In the Important Precautions section with regard to shock, the following text should be revised (underlined parts are revised):

In order to predict reactions such as shock or anaphylaxis, a sufficient medical interview should be performed regarding the history of hypersensitivity to chlorhexidine preparations and for predisposition to drug hypersensitivity in advance.

In the Clinically Significant Adverse Reactions subsection of the Adverse Reactions section with regard to shock, the following text should be revised (underlined parts are revised):

Shock, anaphylaxis:

Shock or anaphylaxis may occur. Patients should be carefully monitored, and if decreased blood pressure, urticaria, dyspnoea, etc. are observed, the use of this drug should be discontinued immediately and appropriate measures should be taken.
