Current			Revision		
2. CONTRAINDICATIONS (This drug is contraindicated to the following patients.) Patients receiving carbamazepine, phenobarbital, phenytoin, fosphenytoin, enzalutamide, rifampicin, mitotane, or food containing St. John's Wort			2. CONTRAINDICATIONS (This drug is contraindicated to the following patients.) Patients receiving carbamazepine, phenobarbital, phenytoin, fosphenytoin, enzalutamide, <u>apalutamide</u> , rifampicin, mitotane, or food containing St. John's Wort		
10. INTERACTIONS 10.1 Contraindications for Co-administration (Do not co-administer with the following.)			10. INTERACTIONS 10.1 Contraindications for Co-administration (Do not co-administer with the following.)		
Drugs	Signs, symptoms, and treatment	Mechanism/risk factors	Drugs	Signs, symptoms, and treatment	Mechanism/risk factors
Carbamazepine Phenobarbital Phenytoin Fosphenytoin Enzalutamide Rifampicin Mitotane Food containing St. John's Wort	The plasma concentration of doravirine may decrease, leading to attenuation of the therapeutic effects.	The strong CYP3A4-inducing effects of these drugs and foods are expected to promote the metabolism of doravirine.	Carbamazepine Phenobarbital Phenytoin Fosphenytoin Enzalutamide <u>Apalutamide</u> Rifampicin Mitotane Food containing St. John's Wort	The plasma concentration of doravirine may decrease, leading to attenuation of the therapeutic effects.	The strong CYP3A4-inducing effects of these drugs and foods are expected to promote the metabolism of doravirine.
