Current	Revision
<p>8. IMPORTANT PRECAUTIONS</p> <p>As symptoms such as dizziness, vision blurred, somnolence, and decreased attention/concentration/reflex motor capacity, etc. may occur, <u>caution patients not to engage in hazardous machine operations such as driving a car during treatment.</u></p>	<p>8. IMPORTANT PRECAUTIONS</p> <p>Dizziness, vision blurred, somnolence, and decreased attention/concentration/reflex motor capacity, etc. may occur. <u>The appropriateness of performing hazardous machine operations such as driving a car should be carefully determined by a physician based on a full understanding of the points to consider provided by relevant academic societies. Patients should be appropriately instructed that, if they perform hazardous machine operations, they should be very careful when performing such operations. Patients should also be instructed that, if they experience somnolence, etc., they should not engage in hazardous machine operations such as driving a car.</u></p>
